Jarron Futter	Website Administration	

Business Profile	
ISOLOGIC was started in 1999 in response to the growing need industries had for	a simple, cost-
effective and sustainable way to implement ISO Management Systems. Existing i	mplementation
systems were too complicated, burdensome, and impractical in the demanding a	and
competitive world of business. Yet every company wants happy customers while	being able to
monitor processes, identify gaps, reduce costs and continuously improve their sy	stems, services
and products.	
To that end, ISOLOGIC has assisted more than 700 companies in Southern Africa	to obtain ISO
standard certification with a 100% success rate.	
Key Processes	
A free presentation of our services outlines how and when such implementation	n can occur and
what investment is required.	
On request we offer pre-implementation GAP analysis. Generally this is included	in our standard
implementation process.	
We ensure not only adequate training of all relevant personnel, but particular atte	ention is equally
given to their motivation. Only when there is buy-in from all relevant staff can a s	ystem flourish.
Our implementation encompasses the preparation for the external Certification a	audit.
Depending on the size of a company and the industry, implementation usually ta	kes place over a
period of 6-8 weeks but can be done faster if required.	
In large companies or specialised Industries it will take longer.

PALIAN Racklock	AND MANY MORE	

What our clients say

ISOLOGIC offered a cost-effective way of aligning our business to the standard. Their expertise ensured that we achieved our target on time. With ISO 9001:2015 Certification, we are better equipped for customer service through consistent processes as well as traceability. **VULCAN STEEL**

ISOLOGIC allowed us to implement an effective QMS that was user-friendly and, through Armin's excellent support, it ensured we were well prepared for our external audit. We have already seen areas we need to work on in order to maintain our quality standard to our clients. The system we were trying to develop was complicated, and required a monumental amount of work. With ISOLOGIC, the Quality Manual and Work Instructions were easily adapted to our needs without affecting the quality of the output data.

BE-SAFE PARAMEDICAL

I can recommend ISOLOGIC as a company with a solid track record. ISOLOGIC'S's approach was thorough and principle-based. Their implementation was simple enough for all our departments to understand - a remarkable feat. We have been audited and received our compliance certificate. **COLUMBUS CLEANING SOLUTIONS**
